📍 Mariano Moreno, Buenos Aires, Argentina

EDUCATION

Technical degree in computer science

Universidad Nacional del Oeste

📅 04/2019 - 04/2019 📍 San antonio de Padua

- Computer architecture, Von Neumann model, assembly language, combinational systems.
- Algorithms and data structures (trees, heaps, graphs, stacks, queues), discrete mathematics (Boolean algebra, rules of inference, logic gates).
- Programming fundamentals in C, flowcharts, object-oriented programming in Java, UML diagrams.
- SQL language and use of PostgreSQL. Database modeling with E-R diagrams.

Full Stack open course

University of Helsinki

📅 09/2023 - 01/2024 📍 remoto

- Practice-oriented Full Stack development.
- Main technologies learned or reinforced: Web application fundamentals
 - React - TypeScript - ExpressJS - React TanStack - Redux Toolkit - React Router - GraphQL - MongoDB - testing libraries.

High school

Escuela secundaria N°11

📅 04/2008 - 11/2013 📍 Francisco Alvarez, Moreno, Buenos Aires.

EXPERIENCE

Analyst and developer

My company

📅 03/2022 - Present 📍 Mariano Moreno, Buenos Aires, Argentina

Carrying out challenging projects and various technical tests of content creators.

- Through these challenges my goal is to continue to exercise and reinforce and integrate my knowledge, using a different set of technologies each time.

PROJECTS

NutriDASH

📅 01/2024 - Present 📍 Moreno, Buenos Aires, Argentina.

Calorie control application, helps weight loss, balance and bodybuilding. Nutritional information.

- This is the biggest application I have made so far. You will use SQLite as the local storage method and React Native with Expo for the user interface.

SKILLS

Programming and markup languages

C Java C# JavaScript

TypeScript SQL HTML CSS

C++

Front-End

ReactJS Angular NextJS

ContextAPI Redux Toolkit TanStack

React Router DOM HookForm SASS

Bootstrap Ant Design

SemanticUI React Tailwind CSS

Back-End

NodeJS ExpressJS Middlewares

bcrypt Zod API Rest Postman

Thunder Client Mongoose

Databases

MySQL Transact-SQL SQLite

MongoDB PostgreSQL

Others

Technical English (doc reading)

English writing and listening

Basic English speaking Git Github

Jira UML E-R Diagrams

PROJECTS

My portfolio

📅 04/2024 - Present 📍 Moreno, Buenos Aires, Argentina.

Development of my web portfolio.

- Using NextJS and Tailwind CSS. AI integration trained to answer questions about me. Use of Semantic HTML and responsive design.

ByteBlog

📅 12/2023 - 12/2023 📍 Moreno, Buenos Aires, Argentina

Application with the MERN stack. Domain: <https://byteblog.adaptable.app/>

- In this incremental exercise of the full stack course described, I made comprehensive use of knowledge in React, ExpressJS and MongoDB.

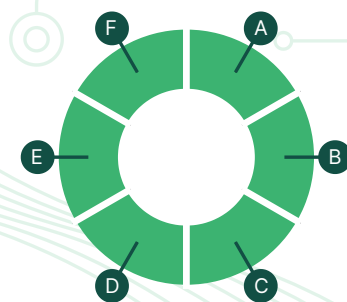

BookNexus

📅 07/2023 - 08/2023 📍 Moreno, Buenos Aires, Argentina.

Technical test by @Midudev. Domain: <https://booknexus.netlify.app>

- In this technical test I used React + TS, Context API and Ant Design.

MY DAILY ACTIVITY

- A Daily project goal planning
- B Coding and/or reading documentation.
- C Break
- D Coding and/or reading documentation.
- E Time spent searching for a job.
- F Physical exercise before bed.
